

Underwriting success stories: Mar 2022

Joyn was launched to remove the pain points and operational inefficiencies that commercial insurance brokers and underwriters experience all too frequently. By building a technology ecosystem from the ground up, Joyn’s broker partners can enjoy a faster, more accurate, and more transparent user experience that saves time while reducing costs and frustration. Here are a few recent accounts within our appetite. Do you have similar risks? Let us show you the Joyn experience - we look forward to partnering with you!
